

FIBROL PETROLEUM PD GREASE (SEMI-LITHIUM COMPLEX)

ADVANTAGES & BENEFITS

PD GREASE have good load bearing properties and provides adequate protection to the bearings.

- Very stable to shearing and oxidation – Extended regreasing intervals
- Provides superior protection against fatigue wear, abrasive wear and pitting or fretting corrosion with extension of equipment life
- Resistance to water washes out – Better bearing protection and lower grease consumption.
- Reduce Energy consumption (low co-efficient of friction).
- Lead and Chlorine free – Less impact to the environment.
