

# FIBROL PETROLEUM SYNTHERM

(SYNTHETIC THERMIC FLUID)

## BENEFITS

- **Large Operating Range** FIBRO SYNTHERM is capable to work under the temperature range of -15 to 320 C.
- **Good Flow Rate:** Good heat transfer is directly dependent on flow rate and low viscosity of FIBROL SYNTHERM Benefits in maintain better flow rate. in maintain better flow rate.
- **Long Life:** Generally we discard thermic fluid after the increase in viscosity and increase in carbon percentage. FIBROL SYNTHERM is approx. 30% less viscose then other Thermic fluid.
- **Non Fouling:** Less solid formation is the uniqueness of FIBROL SYNTHERM's technology and this should be the reason to go with this technology only.
